## REST IN PEACE MR. D. ATTAL

With great sadness, we announce the earthly death of one of Egatha's patients, Mr. D. Attal. We pray for Mr. Attal's family, that the Lord give them peace and comfort during this difficult time.

About a year ago, Mr. Attal was diagnosed with Lymphoma, a rare cancer of the lymphatic system. Due to the financial burden it would cause his family to seek out cancer treatment, Mr. Attal humbly kept his diagnosis a secret. It was only when he began to display symptoms did his family press him for a reason. When it had been revealed that Mr. Attal had lymphoma, his family contacted Egatha for medical support.

Egatha had the blessing of supporting Mr. Attal's chemotherapy treatment for only a month until he finished fighting the good fight. We are honored to have had the time we had to interact with Mr. Attal and his family. We ask you, our trusted and valued supporters, to keep Mr. Attal and his family in your prayers.

Egatha's Patient

The two women depicted are a mother and daughter. The daughter has varying intellectual/developmental disabilities (special needs). As a result, she is prescribed various medications. Because of the increasing difficulty of finding prescription and over-the-counter medications, Egatha has taken on the responsibility of supporting this girl's medicinal needs. Her mother thanks Egatha for its support!

This picture highlights just how dangerous uncontrolled diabetes can become.

The patient went to the hospital presenting symptoms of advanced disease due to lack of medication and delay in seeking medical care. Diabetes management tools are not only hard to find, but they are only available to those who have the means of affording such treatment. This is a sad reality for many men and women in Lebanon.
